DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 8/18/2004, with respect to a restriction have been fully considered and are persuasive. The restriction of 7/19/2004 has been withdrawn.

Specification

2. Under the related application section, the copending application serial No. must be fills.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, *a first reference voltage line and a second reference voltage line* must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement

Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

5. Claims 1-48 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-48, the prior art alone or in combination does not teach the limitations of a capacitor comprising the at least one bottom electrode contact region formed in the strained semiconductor layer adjacent the bottom electrode, the at least one bottom electrode contact region being doped to a first conductivity type wherein the bottom electrode is operationally the first conductivity type.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claims 49-81, the prior art alone or in combination does not teach the limitation of a decoupling capacitor comprising: a semiconductor substrate including a strained silicon layer and a top electrode being connected to a first reference voltage line and a bottom electrode being connected to a second reference voltage line.

Conclusion

This application is in condition for allowance except for the following formal matters:

a first reference voltage line and a second reference voltage line must be shown or the feature(s) canceled from the claim.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
